Our WG operated online, meeting 7 times between December 2019 and September 2020. We met and discussed our mission: to support EADMT members in the process of recognition of the profession in different countries.

A very ambitious task, given the complexity of the reality of the various European countries and our few resources.

During this year we have concentrated our work on two concrete actions.

- 1) Update our research on the recognition of the profession to all member countries.
- 2) To elaborate a comment of the emerged data.
- 3) Make available and publish the findings on the EADMT website (autumn 2020)
- 4) Create a Template of the 4 countries in which the DMT is fully recognized: Estonia, Latvia Netherland (nearing completion) and Switzerland.

We remain open to contributions and proposals for the new year.
